Software Engineer | Full-Stack Developer | Data & Business Systems Enthusiast

I'm a recent Computer science graduate, and a software engineer with over five years of experience building scalable applications across web and mobile platforms using Next.js, React, React-native, JavaScript, TypeScript, Node.js, and PostgreSQL. I am experienced at working with teams, analyzing data, and delivering reliable solutions in fast-paced environments. Passionate about leveraging technology and analytical thinking to improve operational efficiency and customer experience within the banking and financial sector. I've engineered and shipped production systems that solve actual problems. I recently finished the MVP of a system that helps SMEs and individuals monitor meter credit, automate top-ups, and keep receipts organized in one dashboard. I care about clean architecture, efficient data flow, and responsive user experiences, typically working with modern UI frameworks to deliver interfaces that hold up under real-world usage.

WORK EXPERIENCE

Maziv Technologies Limited • 05/2024 – 11/2024

Maziv Technologies Limited is a fully remote tech firm that delivers tailored digital solutions and innovative services.

Frontend Developer • Internship

- Developed responsive, user-friendly web interfaces using **React**, **Next.js**, **JavaScript**, **Tailwind CSS**, **GSAP**, and **Daisy UI**.
- Optimized website performance to improve load times and ensure cross-browser and cross-device compatibility.
- Implemented reusable UI components and maintained consistent design systems across the product.
- Used **Git/GitHub** for version control, feature branching, and code reviews.
- Improved accessibility and SEO performance using modern frontend best practices.

SkyeStudio • Remote • 11/2025 – 02/2026

SkyeStudio is a fully remote tech firm that delivers tailored digital solutions and innovative services.

Software Developer • Internship

SKILLS

Web and Mobile app:

Expo, GSAP, JavaScript (ES6+), MobX, Next.js, React.js, React Native, Redux Toolkit, SEO optimization, Tailwind CSS, Tanstack Query, TypeScript, Vite, Vue, Web performance, Zustand

Backend & Databases:

AI, BullMQ, Express.js, GoLang, Knexjs, LowDB, Node.js, PostgreSQL, Prisma ORM, Python (Fast API), Redis, Zod

Version Control: Git/
GitHub

Data & Reporting: Data Analysis, Data Validation, Microsoft Excel, Microsoft Office, Reporting

Core Competencies:

Attention to Detail, Customer-Centric Thinking, Data Analysis, Digital Transformation, Problem Solving, Process Optimization, System Design, Team Collaboration, Technical Support

- Architected and implemented a Progressive Web App (PWA) with background push notification support
- Designed database schema for push notifications
- Implemented the APIs for push notifications.
- Handled service worker lifecycle and background notification triggers
- Restructured some of the UI

Bejite

World's smartest job site

Frontend Developer • Internship

- Integrated and managed **RESTful APIs** to ensure smooth communication between frontend and backend systems.
- Handled data exchange using **Axios**, implementing secure request flows and managing client-side responses effectively.
- Collaborated with frontend and backend teams to troubleshoot integration issues and optimize performance.
- Maintained reliable data connections and contributed to improving the overall API integration workflow.
- Documented API processes to support future scalability and streamlined development.

JSG Industries • Lagos, Nigeria • 11/2025 – 02/2026

JSG Industries (Nigeria) is a Lagos-based manufacturing and distribution company founded in 2005, specializing in electrical cables, oil lubricants, solar projects, plastic PVC pipes, and food products (rice/cartons). They offer comprehensive construction services and operate as a key manufacturer and supplier for building and industrial projects in Nigeria.

Data Analyst • Internship

- Collected, cleaned, and analyzed large datasets to identify trends, patterns, and insights that supported business decision-making
- Used **Microsoft Excel** to organize and query data efficiently
- Performed data validation and ensured accuracy by detecting and correcting inconsistencies
- Generated weekly and monthly reports to track performance and highlight areas for improvement
- Collaborated with team members to understand data requirements and deliver actionable insights

EDUCATION

Bachelor of Science in Computer Science

University of Africa,
Toru-Orua
01/2021 – 09/2025

Director of Socials
(NACOS)

CERTIFICATIONS

Certified Nomba Developer

Nomba

PROJECTS

Pear | Creator-Brand Marketplace

- Built a cross-platform mobile marketplace connecting content creators with brands through profile discovery, campaign opportunities, and mutual-match interactions.
- Implemented authentication and onboarding flows, including email sign-up/sign-in, role-based onboarding, creator and brand profile creation, Discovery feeds, swipes, matching, and messaging interfaces
- Developed a typed API client with JWT authentication, secure token storage using Expo SecureStore, and structured API error handling.
- Built swipe-based discovery interfaces, campaign browsing screens, and navigation for matches and messaging.
- Implemented reusable UI components, centralized design tokens, and dark/light themes to maintain a consistent user experience.

Lens (AI CFO for SMEs)

Co-founder & Lead Engineer

Link: <https://heylens.orzn.app/>

- Built an AI-powered financial intelligence platform that helps small and medium-sized businesses understand cash flow, monitor financial health, and make data-driven decisions.
- Integrated open banking infrastructure to securely connect business bank accounts and automate financial data aggregation.
- Developed AI-generated financial reports, cash flow forecasting, spending analysis, and business performance insights delivered through web and WhatsApp channels.
- Designed and implemented scalable backend services, subscription billing, report scheduling, and multi-tenant architecture using TypeScript, Node.js, PostgreSQL, Redis, and BullMQ.
- Led product architecture, API integrations, infrastructure design, and end-to-end deployment from concept to production.

Myle — AI-Powered Lead Generation & CRM Platform

Co-founder & Lead Engineer

Link: <https://myleshq.vercel.app/>

- Built an AI-powered lead generation and CRM platform for discovering, researching, qualifying, and managing business prospects.
- Designed and developed a dedicated **Python/FastAPI scraping microservice** for high-volume web data extraction and lead discovery.
- Architected an asynchronous lead discovery pipeline using **BullMQ and Redis**, enabling background processing, caching, and scalable data enrichment.
- Built AI-powered workflows for company research, lead enrichment, decision-maker identification, buying-signal detection, and deterministic lead scoring.

- Developed CRM functionality for managing companies, contacts, activities, notes, tasks, and customer timelines.
- Implemented multi-tenant architecture, RBAC, API integrations, analytics, and automated workflows across the platform.
- Designed and maintained backend services using **TypeScript, Node.js, PostgreSQL, Prisma, Redis, and Python/FastAPI**.

Grabit (Social Multiplayer Platform)

Link: grabit.lol

- Built and launched a browser-based **2D social multiplayer platform** enabling users to interact and connect in shared real-time environments.
- Developed the application end-to-end, including authentication, multiplayer state synchronization, user interactions, and persistent data.
- Designed a modular environment system supporting multiple interactive themes and extensible social features.
- Deployed and maintained the production application on **Vercel**, taking ownership of architecture, development, and launch.

SillyAI

Link: <https://silly-ai-frontend.vercel.app/>

Most online learners struggle with scattered resources, unclear learning paths, and content that doesn't match their current knowledge level. SillyAI was built to solve this by generating structured, personalized learning journeys using AI.

VOLUNTEERING & LEADERSHIP
